# ABINASH MOHANTA

Angular Developer

## PROFILE

Experienced Angular developer with 3 years of hands-on expertise crafting dynamic web applications. Proficient in utilizing Angular framework, HTML, CSS, Angular Material, JavaScript and TypeScript to create responsive and intuitive user interfaces. Passionate about solving complex problems and staying updated with the latest web development trends. Dedicated team player with a proven track record of delivering high-quality projects on time.

## WORK EXPERIENCE

**Company Name : Capgemini Technology Services Pvt. Ltd.**

**Job Role :** Associate Consultant                    **Sept 2021 - Present**

**Project Name:** CEPNG (Reinsurance Domain Project)

- Developed and maintained frontend components for web applications using Angular framework to support reinsurance processes.
- Worked closely with business analysts to design and implement user-friendly interfaces for costing processing, management & reporting.
- Integrated Microsoft Entra ID using MSAL in the Angular application, enabling seamless single sign-on (SSO) for internal users across the organization.
- Collaborated with backend developers to design API contracts and ensure seamless integration.
- Implemented responsive designs and ensured cross-browser compatibility.
- Utilized Angular Material library to design application efficiently.
- Migrated legacy Angular versions to the latest versions which enhanced application performance and maintainability.
- Reduced the need for major code changes during senior code reviews by following the best practices in Angular development, coding standards, and ensuring clean and modular code.
- Excellent debugging and troubleshooting skills.
- Experience in version control tool like GIT.
- **Learnings:** Angular templates, Directives, Binding, Pipes, Decorators, Dependency Injection, Routing, Forms, HTTP Client & Observables, Component Lifecycle and Services.

## CERTIFICATION & ACHIEVEMENT
